

Destinations

What You Need

- Destinations Currency Conversion Chart
- Destinations Cards (two or more sets)
- Destinations Spinner
- Calculators

Set-Up

- Play in a small group.
- Put the Destinations Cards face down in a pile.
- Put the Destinations Spinner and the Destinations Currency Conversion Chart where everybody can reach them.

Objective

Players draw a card and spin to see how much of what type of currency they will buy. Answer correctly to keep the Destination Card.

The first person to collect five cards wins.

How to Play

- On your turn, draw a card to see what your destination is. Spin to see how much foreign currency you will buy.
- Calculate to determine the exchange. Other players check to confirm your answer.
- If you answered correctly, keep the Destination Card.
- Try to be the first player to collect five Destination Cards.

Other Ways to Play

- Create your own version of the game, using destinations of your choice. Make new Destinations Cards and a new Currency Conversion Chart.
- Use the same destinations, but update the Currency Conversion Chart to match today's exchange rates.

Destinations (continued)

Example

Mindy draws Mexico and spins 50.
She figures out how many Canadian dollars she needs to buy 50 Mexican pesos.

CAD 1 = MXN 16.12

So, MXN 50 = CAD 3.10, to the nearest cent.

Mindy's conversion is correct; she keeps the card.

Kole draws the Bahamas card. He spins 25.

He calculates:

\$1 Canadian = \$0.81 Bahamian

\$25 Canadian = \$20.25 Bahamian

Kole notices that a Canadian dollar is worth less than 1 Bahamian dollar, so \$25 Bahamian must be worth more than \$25 Canadian. (Kole's calculation would work for figuring out the value of \$25 Bahamian in Canadian currency, but that is the opposite of what he was supposed to do.)

Kole returns the card to the bottom of the pile.
